CUSTOMIZATION & DEPLOYMENT

DEPLOYMENT TYPE WE OFFER

DEDICATED SERVER

It offers immense power and flexibility, but usually comes at a premium. Your options here could include an upgrade to a virtual private server (VPS) or a dedicated one.

CLOUD

Working in cloud-based environments makes it easy to create and build towards establishing a high degree of integrated functionality plus the deployment is much simpler, faster and less expensive as no on-site infrastructure is required.

OWN PREMISES

It's best for those who don't prefer internet glitches and the entire solution is deployed on a static IP hence zero dependency on third party servers.
