SOLUTIONS

PRODUCT MODULES

INVENTORY MONITORING & MANAGEMENT

BI based inventory management lays a solid foundation for the digitization of the restaurant industry ecosystems and offers both process and business insights.

TABLE RESERVATION MANAGEMENT

This is critical for the Dine-in restaurant experience. You should be able to accept table reservations from your website and manage all your table reservations from your restaurant management system.

STAFF MANAGEMENT

In this module, the admin will manage the staff. If we want to track every employee of the restaurant we need to maintain his/her record. This module will contain functionalities such as attendance, salary, shift management.

ORDER MANAGEMENT

It is always a great idea to be on top of what happens at your restaurant, both online and offline. Like the orders, you get both through your own order platform and online food aggregators like Foodpanda, Swiggy, Zomato.

RESTAURANT MARKETING MANAGEMENT

Communicate all your offers, your menu items, your special discounts the right way and more. This is what keeps your customers engaged and gets them back to your restaurant. It includes CRM, Loyalty Programmers, App Marketing etc.

POINT-OF-SALE OPERATIONS (MOVING BEYOND JUST BILLING)

These days, POS operations include so much more than punching orders and billing. Loyalty integrations help drive customer delight, whilst menu recommendations help in predictive selling.

KITCHEN MANAGEMENT

The module helps in paperless hassle-free management & digitize KOTs by displaying orders on screen and organize the kitchen so that there is zero communication gap between kitchen staff & attending staff.

PRODUCT MODULES

TASK MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

RECRUITMENT MANAGEMENT

A recruitment management system is a set of modules to help you in staffing and recruitment operations automatically.

LEAVE MANAGEMENT

It helps to maintain both manual credit and debit entry of leaves and update the current balance of leaves. It can also keep a track of leave encashment and consider excess leaves a loss of pay.

ATTENDANCE MANAGEMENT

It provides a feature to keep a record of attendance inside the system eliminating manual effort consuming tasks. It is also linked with the school academic year.

PAYROLL MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

CRM

The module allows an organization to manage its relations with the customer in a structured manner.

BANKING MODULE

Helps the organization in managing its all banking services such as fund transfers, account opening, passbook management, etc from the ERP itself.

ADMIN MODULE

it allows the system administrator to set up the back-end of the system and perform basic system configuration, mainly the definition of predefined drop-down fields, etc.

TAXATION MANAGEMENT

This module provides organizations with centralized tax configuration, management, and reporting with the integration of the accounting module.

PRODUCT MODULES

SALES MANAGEMENT

This module is used to perform the operation and document-based tracking of all sales transactions.

PROCUREMENT MANAGEMENT

The module includes all the functionalities allowing complete management of the purchases of articles or subcontracting.

REPORT MODULE

Report Module helps the user to create the predefined and customized report as per requirements excess leaves a loss of pay.

EMPLOYEE PROFILE MANAGEMENT

The module helps the organization to automate their current employee profiling system in a more structured way for better record access and decision making.

PERFORMANCE MANAGEMENT

It enables managers to track and monitor the performance of individual employees as well as departments, and the overall organization.

ACCOUNTING MODULE

It automates financial and accounting activities. It collects information and crafts reports: general ledgers, fixed assets, receivables, payable, cash flows, etc.

EMPLOYEE MONITORING MODULE

The module helps in monitoring employee working both inside & outside office premises by screen record, IoT tools, video recording, etc.

APPROVAL MANAGEMENT

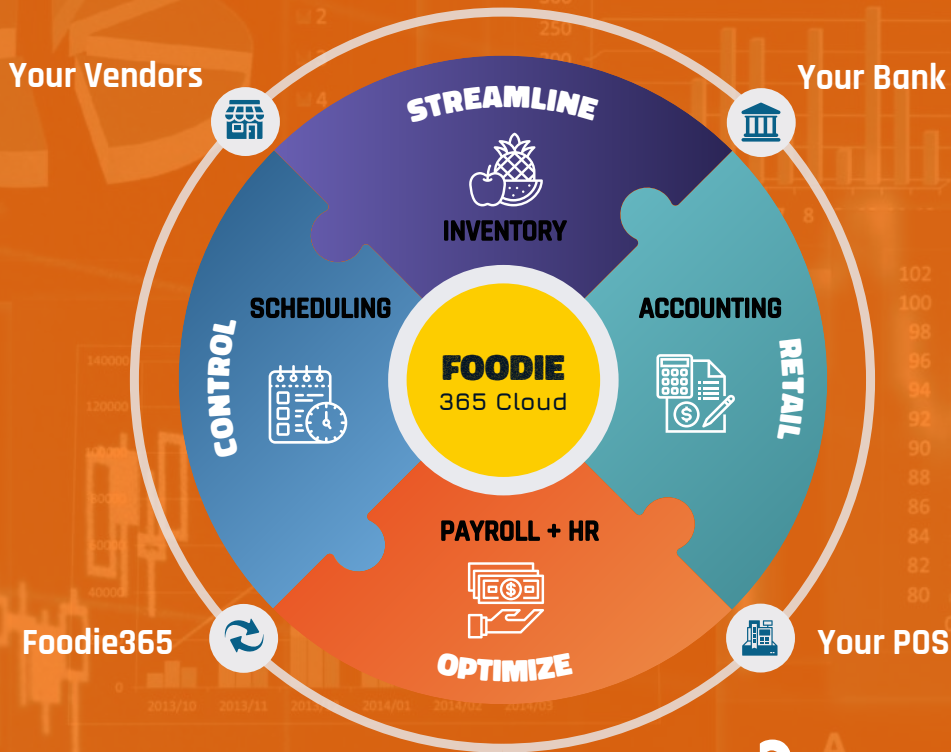

The module digitizes and automates your current approval mechanism for quick & structured decision making.

SOCIAL MEDIA MANAGEMENT

The module helps in managing different social media accounts on a single platform with BI-based dashboards and customized reports.

CUSTOMIZATION & DEPLOYMENT

DEPLOYMENT TYPE WE OFFER

CONSULT

Consult with the internal or external team running point on the project to map out the exact journey your IoT deployment will take, would include sub-stages from feasibility test to ROI calculation.

DEVELOP

Here's where boards get developed, the cloud platform gets built out and the analytic framework is set. It's also when all the business relevant features are configured from analytic, artificial intelligence (AI) and machine learning.

DEPLOY

Here's where forward stocking for backup hardware, technical customer support, and tech support for Wi-Fi or cellular networks, gateways, web interfaces, apps and your new cloud platform all come into play.
