"Technology With Integrity"

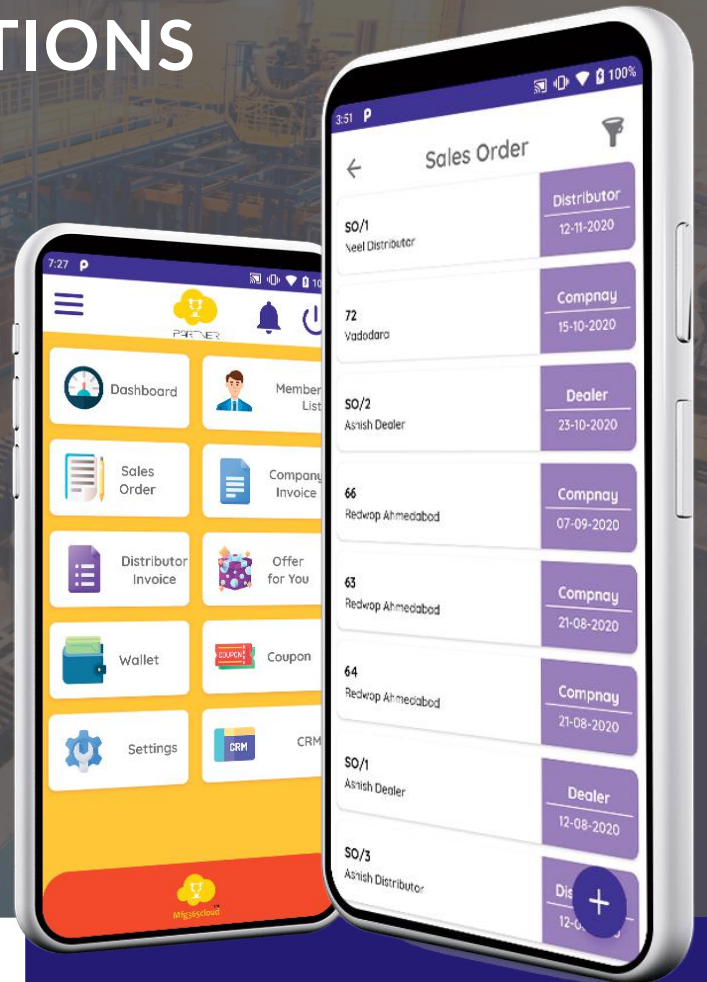

# Easily Manage Production Planning & Control for Manufacturers

Manufacture, Demand and Supply are three major activities of any manufacturing industry. Once a product is manufactured, it needs to be delivered to a prescribed destination or hub and stored. Now, all this data must be interlinked, which is the prime motive of Mfg365cloud.

# INTELLIGENT SOLUTIONS TO SOLVE MANUFACTURING CHALLENGES

it is planning, developing, sales forecasting or any other important business operation for a manufacturing business, we assist in everything. Manufacturing365cloud is designed in such a way that after the integration it provides a cross-sectional view of whole operation which eventually deducts the chances of errors and contributes in taking better decisions.

## OUR FEATURES

- Bill of Materials and Routing
- IoT Integration
- Payment Gateway with Trusted Banks
- Smart Calendar & Chat Bots
- AI & BI-based Dashboards
- Master Production Scheduling
- Planning & Scheduling
- Automated Data Collection
- Integration with Plant Floor Machinery
- Mobile Access to Data

## PRODUCT BENEFITS

- ✓ Faster Response Time
- ✓ Scalable to Support Rapid Growth
- ✓ Optimise Workforce Productivity
- ✓ Strategic Decision Making
- ✓ Reduce Risk & Operationalize Data
